

## INSTALL IT. TRUST IT.

# HT/ArmaFlex Industrial

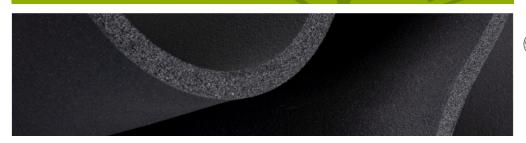

Industrial grade FEF insulation material designed for applications with elevated temperatures in oil and gas industry

- // High density and mechanically robust for superior stability and multi-layer application
- // Enhanced temperature capability
- // Built-in water vapour barrier reduces risk of corrosion under insulation (CUI)
- // Retains its physical characteristics throughout its
- // Low maintenance and repair costs
- // Low leachable chloride content (< 30 ppm) to minimise stress corrosion cracking (SCC)
- // Low thermal conductivity to minimise energy losses

#### TECHNICAL DATA - HT/ARMAFLEX INDUSTRIAL

Thermal conductivity	Brief description	HT/ArmaFlex Industrial is a flexible, high density and mechanically robust, closed-cell thermal insulation material based on extruded elastomeric foam. The product has been specially developed to provide enhanced thermal resistance of the insulation systems with its low thermal conductivity.						
HTT/ArmaFlex Industrials is resistant to elevated operating temperatures. The product is suitable for use in multi-layer applications including ArmaSeaude Industrial Systems.	Material type	Factory-made flexible elastomeric foam based on ethylene propylene diene methylene (EPDM), according to EN 14304.						
Including ArmaSound Indicatival Systems.  Product range  Tuber, 13, 19 and 25 mith Includes a Trailing Arma Sound Indicatival Systems.  Thermal inocidation of pipes, wessels and duric functioning ellews, liftings, flanges, et al. in offshere, industrial pipe and you and or creed a collision in industrial pipe and you actually involved in a discrete acquirement facilities. H7AmFRefor Industrial is also used as a component of ArmaSound Industrial Systems to provide acquired in a discrete acquirement facilities. H7AmFRefor Industrial is also used as a component of ArmaSound Industrial Systems to provide acquired in a discrete acquired in	Product colour range	Black						
mm thickness.  Applications   The main insulation/protection of pipes, westell and ductor (including albows, fittings, flanges, etc.) in offshore, industrial pipecally all and process equipment facilities. HT/ArmaFlox Industrial allow used as a component of ArmaSound Industrial Systems to provide a south of ArmaSound Industrial Systems to Cartificate of Fire Approval by Controlling Provided Industrial Systems to Cartificate of Fire Approval by Controlling Provided Industrial Systems to Cartificate of Fire Approval by Controlling Provided Industrial Systems to Provide Systems to Cartificate of Fire Approval by Cartificat	Special features				ating temperatures.	The product is suit	able for use in muli	i-layer applications
gas land provide account inclusion on industrial pipework and wested enumy reduction of sound inframentation.  Installation Por Industrial applications it is recommended to consult the relevant Armacell application manual(s). For further information please contact our Technical Services. 	Water absorption by vacuum	< 4% by mass (total submersion for 2 x 180 seconds, vacuum pressure 17.2 kPa or 2.5 psi)					ASTM D1056	

Property	Value / Assessment	Standard / Test method	
Corrosion mitigation			
Leachable (water-soluble) chlorides	uble) ≤ 30 ppm (mg/kg or μg/g)		
pH-value <sup>3</sup>	7 to 9	ISO 10523	
Stress corrosion cracking <sup>3,8</sup>	No cracks under magnifying glass on test coupons after evening, cleaning and rebending.	ASTM C692	
Physical attributes			
Density	Sheets: 70 to 85 kg/m³ (4.4 to 5.3 lb/ft³) Tubes: 60 to 75 kg/m³ (3.7 to 4.7 lb/ft³)	ISO 845, ASTM D1622	
Dimensions and tolerances	According to EN 14304, for detailed values, please refer to product range tables.	EN 822, EN 823, EN 13467	
Mechanical properties	•	•	
Tear strength	>0.4 kNm (>2.3 lbf/in)	ISO 34-19	
Compression deflection			
Compression deflection 25%	> 15kPa (> 2.2 psi) at 25% deflection	ISO 6916-1 <sup>10</sup>	
Acoustic performance	•	•	
System acoustic insertion loss	When used as part of a system: HT/ArmaFlex Industrial complies to ISO 15665 Classes A to C and Shell DEP 31.46.00.31-Gen Class D. Minimum acoustic service temperature (interface temperature to pipework or underlying thermal insulation layers) is -40 °C (-40 °F).	ISO 3741, ISO 15665 <sup>11</sup>	
Weather and UV resistance			
Weather resistance	In all industrial applications, the outer layer of the material must be protected with an adequate covering like Arma-Chek R, metal jacketing or preformed UV-cured Glass-Reinforced Plastic (GRP) cladding. For further information, please contact Technical Services.		
Health and environment			
Health aspects	Neutral, SDS available on request.		
Other technical features			
Adhesion and sealing <sup>12,13</sup>	ArmaFlex HT625 adhesive should be used for reliable adhesion of joints and seams. HT/ArmaFlex tape can be used for application.		
Application conditions <sup>14,15</sup>	Application temperature should be maintained at +5°C to +35 °C (+41°F to +95°F) and at a maximum relative humidity of 80%.		
Closed-cell content	> 90% (declared on the basis of the water absorption test.)		
Shelf life <sup>16</sup>	Maximum of 3 years.		
Storage	Material shall be stored indoors, in clean and dry conditions, away from direct sunlight.		

<sup>&</sup>lt;sup>1</sup>For use in temperatures beyond the published value, please contact Technical Services.

<sup>&</sup>lt;sup>2</sup> Equivalent methods ASTM C177 and C518.

<sup>&</sup>lt;sup>3</sup>Based on single test results. Can be used for information / reference only.

 $<sup>^4\</sup>mbox{Meets}$  the criteria of floor coverings and primary deck coverings.

<sup>&</sup>lt;sup>5</sup> For further information regarding water vapour transmission resistance, please contact Technical Services.

<sup>&</sup>lt;sup>6</sup>Equivalent method to ASTM E96.

<sup>&</sup>lt;sup>7</sup>Specimen prepared according to EN 13486: neither cut, ground nor blended. Test temperature +100°C, leaching time 0.5 hours as specified in the standard for product maximum service temperature.

 $<sup>^{8}</sup>$ The coupons from type 304 stainless steel, 1.5 mm thick. 28 days drip test using deionized or distilled water at around +100°C.

<sup>&</sup>lt;sup>9</sup> Minimum value in Machine Direction (MD) and in Cross Direction (CD). Method B, procedure (b), angle test piece with a nick.

<sup>&</sup>lt;sup>10</sup> Equivalent method to ASTM D1056.

<sup>&</sup>lt;sup>11</sup> Equivalent method to ASTM E1222.

<sup>&</sup>lt;sup>12</sup> During storage of the product, blooming on the surfaces may occur. This blooming does not affect the technical properties of the material, but can affect the adhesion properties. Therefore, the surface needs to be cleaned (wiped off) before adhesives can be applied.

<sup>&</sup>lt;sup>13</sup> For further information, please contact our Customer Service.

 $<sup>^{\</sup>rm 14}$  For environmental conditions outside the given range, please contact Technical Services.

<sup>15</sup> Application temperature (temperature of installation) refers to the ambient temperature during application and the surface temperature of the substrate to which the product is installed.

<sup>&</sup>lt;sup>16</sup> Shelf life (maximum storage time) is limited to ensure that only currently manufactured products are installed on projects. This limitation is restricted solely to storage of the product and does not affect the lifetime of product after it has been installed.

### ABOUT ARMACELL

As the inventor of flexible foam for equipment insulation and a leading provider of engineered foams, Armacell develops innovative and safe thermal and mechanical solutions that create sustainable value for its customers. Armacell's products significantly contribute to global energy efficiency making a difference around the world every day. With more than 3,300 employees and 25 production plants in 19 countries, the company operates two main businesses, Advanced Insulation and Engineered Foams. Armacell focuses on insulation materials for technical equipment, high-performance foams for acoustic and lightweight applications, recycled PET products, next-generation aerogel technology and passive fire protection systems.
